

ORGANIZER

What you were waiting for!

MyGol software was designed by sports league organizers and it was born because of the lack of a tool in the market that really covers the needs that competition organizers have. Our main goal is to eliminate work hours to the organizers and especially make team delegates tasks easier, because they are the ones that keep organizers into competitions, as it is well known that a team lasts until its leader gets fed up of putting money from his own pocket, chasing after players to get the necessary documentation among other tasks that reduce their patience over time. At the end, most teams dissolve because no one wants to assume the responsibility of the team.

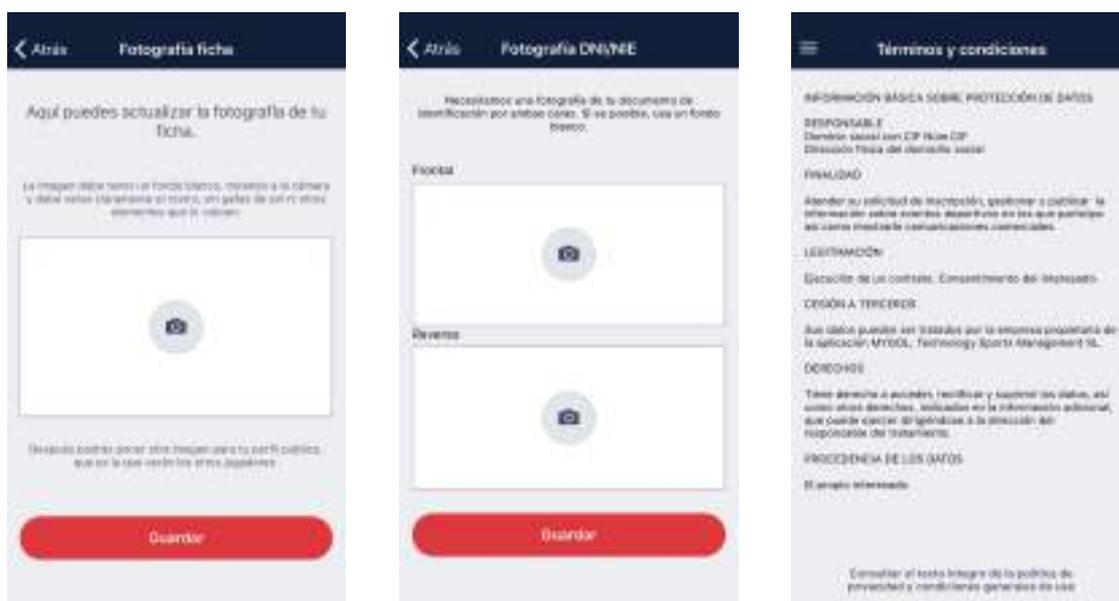

MyGol is made of two apps and a web control panel. All of them are linked to each other and are indispensable to the system proper functioning. All players must have their own app downloaded in order to register in their teams and join the competitions.

The control panel lets you set up the whole structure of the competition, design the public zone to your liking and monitor the competition day by day.

Referees have their own personalized app, with a calendar that shows the matches they have been assigned with and all the incidents that can occur during a match, because MyGol allows you to record live matches events, and lets players and supporters watch in real time their team and their rival teams' score.

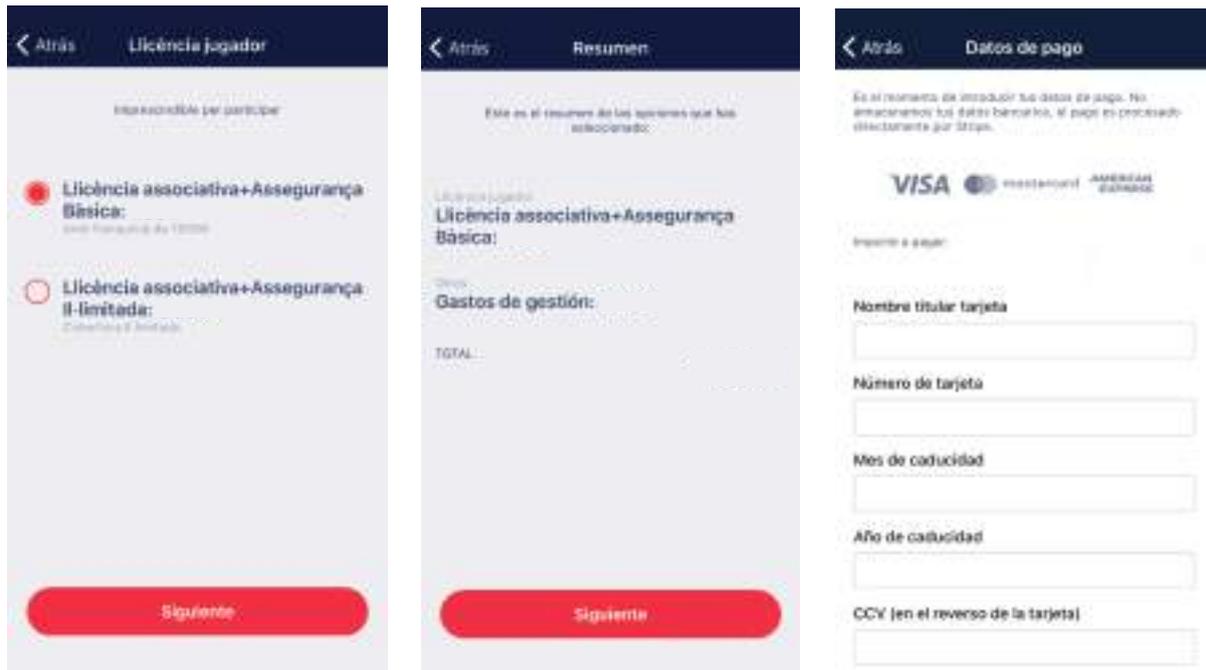

1. Players App

Every player receives an invitation via e-mail in order to join a team. As soon as they download the App, the inscription process begins: they enter their personal data, upload a picture of themselves and another picture of their supporting document. Then they accept the data protection law and make the payment of the corresponding fee (only when needed). Once these formalities are fulfilled, the organizer validates that everything is correct and proceeds to register the player in the team.

1.1 Payment gateway

The payment gateway allows the organizers to set up all those payments that they want the players to do, such as the team fee, the accident insurance, the equipment, etc. Setting up the payment gateway allows establishing a unique competition payment for all teams. Inside that setting you can set up a special fee for a certain team, and inside that team, a specific setting for a certain player.

1.2 Notification service

MyGol offers a notification system in the app. It shows if the player has been booked and the number of matches that it involves, the matches' schedule and its modifications, rival teams' results and the players' achievements (MVP, scorers ranking, assists, less scored goalkeepers and the ideal team of the day) and it also shows all those notifications that the organizer wants to send to all players, or a certain team or player.

1.3 Check competition information

Players can check all the competition information, calendars, yellow/red cards and rankings, either from their competition or others in which they do not participate, and they can check the scoring of the matches on real time.

1.4 News and advertising - New in 2021 -

Users can access to the news that the web publishes. Those news that the organizer considers that are important will be visible automatically while the user is browsing the application, and he will have to close the news in order to keep on using the app.

This system will be also used for the future advertising promotions: the organizer will design the ads and will determine the frequency of the advertising appearances in the users' apps. In this new functionality you will be able to adapt the integrated advertisings in specific spaces in the app.

1.5 Field and referee payment gateway - New in 2021 -

This functionality will allow organizations in which local teams pay for the pitch and the referee fee of the match. The administrators of the team will have the option of paying those fees towards the app with a credit card. This option will allow dividing the cost between the two teams, and as soon as the organizer checks the payment, the match will appear on the calendar of the competition that authorizes the match to be able to be played.

JORNADA 1 - FASE CLASSIFICATÒRIA GRUP B - POSICIÒN 1										Borrar
GRUP B										
11/11/2019 22:00	ASTON BIRRA		8	0		C.F. PARDINYES	UE BORDETA 2			
11/11/2019 22:00	CUBAS SEGRE		4	2		EKIPO LOKAL	UE BORDETA 3			
11/11/2019 22:15	RECREATIU ILERDA		3	1		BAR ORDRE DEL TEMPLER	CF PARDINYES 2			
13/11/2019 22:00	NIUTIM CHAMPIONS		1	9		CALDERERIES FERRER PONS	UE GARDENY			
14/11/2019 22:00	CAFÉ PARIS		6	2		PONENT UNITED	TORREFARRERA COMPLEX			

2. Control panel web

This is the work screen in which the organizer can set up the structure and the public image of the competitions, in a very simple and intuitive way. It is also the place where administrators can set up the squad, the strip, edit the team shield, define the tactics and personalize with pictures and sponsors their public site.

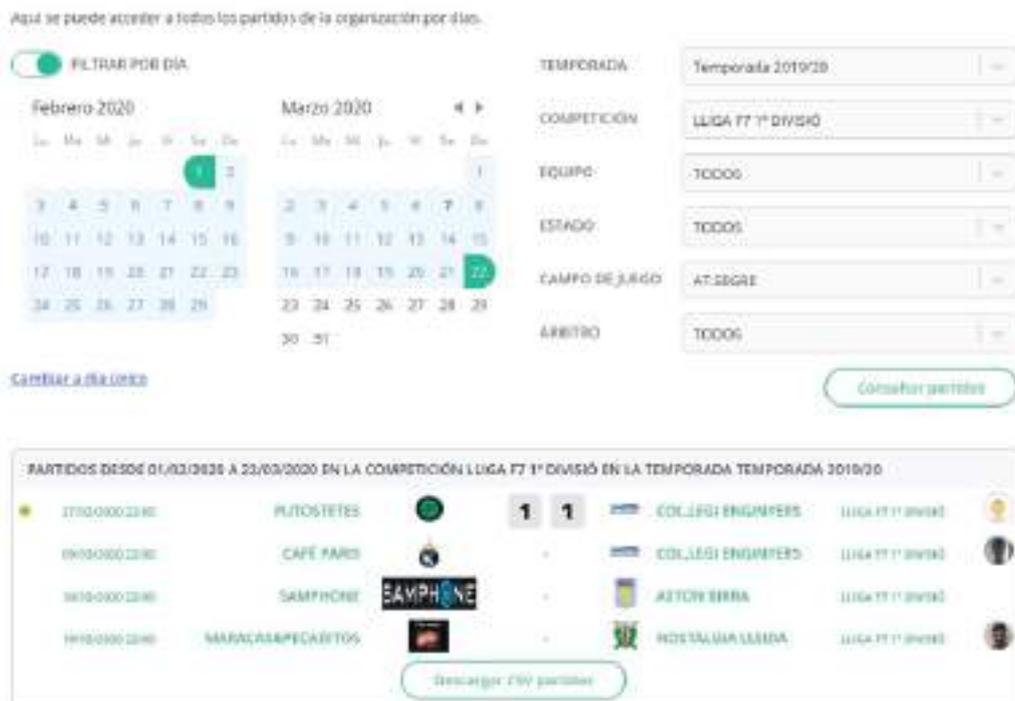

2.1 Report creation

This option helps you generating Excel documents from the organization database, with all players and their personal data, and to create payment reports where you can check the day in which they were made and the proof from the payment gateway.

2.2 Competition filtering

This option allows you to choose the season, a certain competition, a determined date range, the game fields and the referees in order to generate Excel documents. This functionality lets you know in a fast way the number of matches that have been or will be played from a certain competition, in a certain pitch. It will also generate a report about the referees in a certain period of time. This is an essential tool for an organizer because it can show you in seconds, towards an Excel report, the cost of pitches and referees.

2.3 Web design

Design your own web with the background you prefer, the type and colour of the letter, for all competitions or individually for each of them, getting all competitions to have a webpage that is different from the others in terms of image and design.

2.4 Automatic cards configuration

Manage the cards from your competition and the punishment they carry automatically at the moment that the referee enters the “card” event: the stipulated punishment will be automatically generated.

⊖	18	Anton Ivanov Parapanov	Ajusta tarjetas acumuladas	82°
⊖	18	Anton Ivanov Parapanov	Tarjeta roja	82°
⊖	18	Anton Ivanov Parapanov	Tarjeta amarilla	82°
				81°
⊖	18	Anton Ivanov Parapanov	Tarjeta amarilla	77°

SANCIONES

CONFIGURACIÓN DE TARJETAS

Para la gestión de las tarjetas, así como de la forma de aplicarlas, se han configurado los parámetros de sanciones. Los cambios generados automáticamente a partir de los datos de configuración de la competición.

COMBINACIONES

COMBINACIONES	ASIGNAR LAS SANCIONES
2 Tarjetas amarillas = 1 Tarjeta roja	Tarjeta roja (1 tarjeta amarilla por tarjeta)
1 Tarjeta roja = 2 Tarjetas amarillas	Tarjetas amarillas (2 tarjetas por tarjeta)
1 Tarjeta roja + 1 Tarjeta amarilla = 2 Tarjetas amarillas	Tarjetas amarillas (2 tarjetas por tarjeta)
1 Tarjeta roja + 2 Tarjetas amarillas = 3 Tarjetas amarillas	Tarjetas amarillas (3 tarjetas por tarjeta)

TIPO DE SANCIÓN

Asignar el tipo de sanción que se aplicará automáticamente a cada tarjeta amarilla o roja. Si se aplica un número de tarjetas amarillas o rojas, se aplicará automáticamente la sanción correspondiente.

TARJETA	TARJETAS	SANCIONES
Tarjeta 1	1 Tarjeta amarilla	Sanción: 1 tarjeta amarilla
Tarjeta 2	2 Tarjetas amarillas	Sanción: 1 tarjeta amarilla
Tarjeta 3	3 Tarjetas amarillas	Sanción: 2 tarjetas amarillas
Tarjeta 4	4 Tarjetas amarillas	Sanción: 3 tarjetas amarillas

2.5 Booking setting up

Once the cards have been set up, the number of matches that the booking carries will be linked, and the system will automatically generate the booking to the player, with the list of matches in which he will not be able to participate. That player will appear in the match record and it will also be communicated to him the booking with a notification. It also allows to punish teams either with a loss of points or economically. It also exists an internal communication way between administrators and the organization in order to submit the corresponding allegations.

2.6 Calendars

MyGol makes it easy to create competition calendars, it lets you know which teams never coincide as home teams, it lets you assign a pitch as local/home to the teams, the days of the year in which you don't want to play because of festivities, and it forbids to assign a match to the same day, at the same time, with the same referee and to create eliminatory matches without assigning the teams, but setting the day, time and field.

2.7 Credentials designing and printing

MyGol helps you design the credentials for the events you wish, with the information and the picture of the players signed on the competition, saving lots of hours of work.

2.8 Ideal team and player's achievements

MyGol is not only a tool that helps saving lots of hours of work to the competitions organizers, we also know about the importance of creating a link between players and the organization. That's why, for example, the software automatically generates the achievements of each player, and they are sent to them towards an app push notification, so they can share them on their social networks and keep a registry of their achievements through the whole season on their profiles.

Inside the achievements section we have the "ideal team": the system generates an assessment according to the statistics of the round, and it creates a list of players with a scoring. The organizer only has to drag and drop the player with the best scoring into the corresponding pitch position.

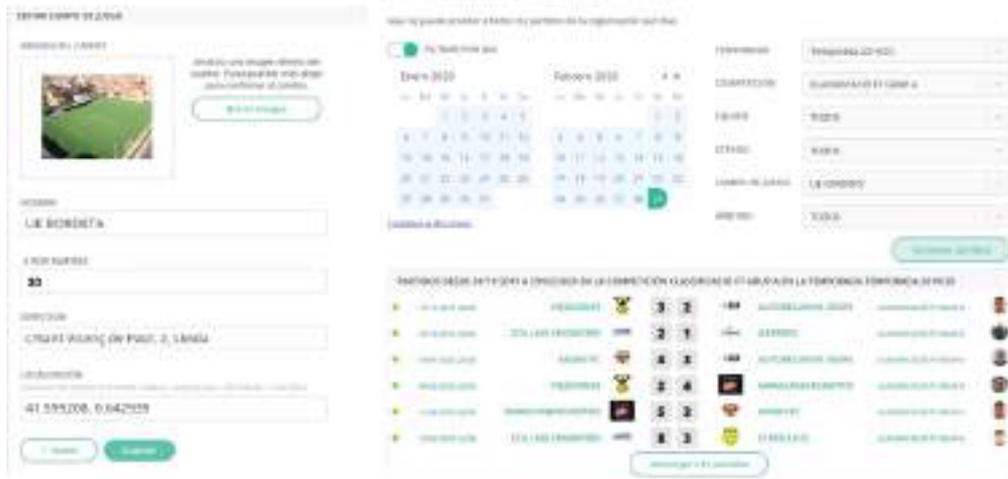

EQUIPO IDEAL

2.9 Accounting- New in 2021 -

Can you imagine stipulating the fee of renting a pitch? Or setting up the referee cost? Can you imagine that every week, month or trimester you can get an Excel document with the total amount of payments to the referees and the cost of the renting of pitches?

We do have thought about it and it is in a development phase, as it is our wish to end with those lots of hours of calculating how much you have to pay to referees and clubs.

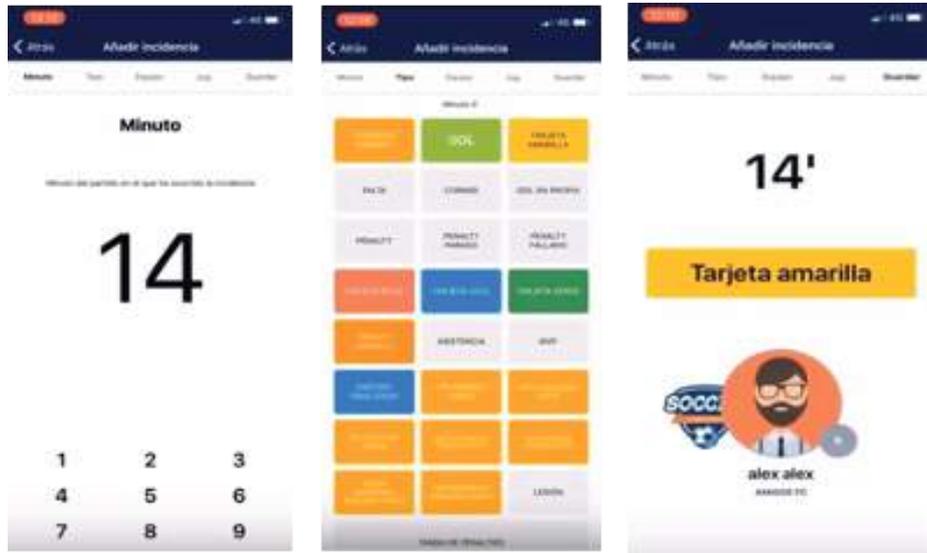

3. Referees app

Each referee has a match calendar in their mobile app, where they can see those matches in which the organizer has set him as the referee for the match. As soon as the referee starts a match, he gets access to each squad in order to make the corresponding check of the players. By clicking on the players profile on the app he can check the pictures and certify the presence of the player on the match record.

As soon as the line-up of the teams are checked, the referee has a chronometer in order to set the duration of the match. When something happens during the match, the referee selects inside the menu the corresponding event: the player related to it and this information goes directly to the match record, which can be seen on the public webpage and the players' app.

When the referee ends the match and closes the match record with the app, statistics are recalculated, bookings of players are registered and the table or leaderboard is updated. MyGol is a system that saves you lots of hours of work, it makes your organization take a leap in quality regarding your competitors and only you are able to offer everything that is happening in your competitions up-to-the-minute.
